Summary

Versatile and goal-oriented third-year B.Tech Computer Science student specializing in Artificial Intelligence and Machine Learning, with strong foundations in Front-End Development. Experienced in building dynamic, responsive web applications using modern front-end technologies. Passionate about integrating AI/ML models into real-world applications to create intelligent, data-driven systems. Skilled in problem-solving, API development, and deploying scalable solutions. Eager to contribute to innovative tech projects that bridge software engineering and machine learning.

Education

Swami Vivekananda Institute of Technology | B.Tech in CSE (Artificial Intelligence and Machine Learning) Sept 2023 – May 2027

- CGPA : 7.9

Sri Chaitanya Junior College | MPC

June 2021 – May 2023

- GPA : 9.5

Sri Chaitanya Techno High School | SSC

March 2020 – May 2021

- GPA : 10

Skills

Programming Languages: C, Python, Java.

Web Development: HTML, CSS, JavaScript, React.Js, Firebase.

Tools and Technologies: VS Code, Git, GitHub, Figma, Codepen, Chrome Dev Tools.

Soft Skills: Leadership, Communication, Teamwork, collaborative, Problem Solving, Adaptability.

Projects

Drone System Engineer – Team IMPACTEERS, SIH 2023 Finalists

AI-Powered Traffic Surveillance System | Aug 2023

National Level Hardware Hackathon by Government of India

- Developed a hardware-based solution to tackle urban traffic congestion using drone and CCTV footage analysis.
- Designed and operated the drone mechanism and configured its flight controller for aerial data collection.
- Integrated computer vision tools to extract vehicle details (number, type, and owner) from real-time footage.
- Selected as a finalist team out of thousands, representing innovative hardware solutions at the national stage.

MediMirror: AI + AR Health Guide | GCET (National Level Hackathon)

github.com/medi-mirror

Full Stack Developer – Geenovate 2K25 | Apr 2025

- Developed MediMirror, an AI + AR-powered web app that assists illiterate users in understanding medical prescriptions through voice and visual cues.
- Managed the database architecture and integrated it with the React-based frontend for dynamic content rendering.
- Focused on responsive design and clean UI to ensure cross-device compatibility.
- Implemented features for voice input, OCR extraction, and AR-based health illustrations to enhance usability.
- Collaborated with teammates to build an inclusive healthcare solution during a fast-paced hackathon.
- Integrated multi-language support to make the platform regionally adaptable and user-friendly for rural communities.

Frontend Web Developer – TECHNO UDH BHAV 2025, SVIT

github.com/techno-udhbhav

Tech Fest Website | Jan 2025 – Feb 2025

- Designed and developed the official multi-page website for the college tech fest using HTML, CSS, and JavaScript.
- Showcased event schedules, registrations, and updates with a responsive and user-friendly interface.
- Collaborated with event coordinators to ensure timely updates and smooth user experience.
- Hosted and deployed the site on GoDaddy with a custom domain.

Nitya Stotra Parayanam – Devotional Website

Nitya Stotra Parayanam Organisation | June 2025

github.com/nityastotraparanayam

- Developed a spiritual website for daily chanting sessions and class schedules.
- Built with HTML, CSS, and vanilla JavaScript — no frameworks used.
- Designed two-row navbar, class cards, and footer with glassmorphism and responsive design.
- Included well-structured pages: Contact, FAQ, Privacy Policy, and Terms.

Project Lead – KAPDAY (E-commerce Website)

github.com/kapday

Academic Project | AUG 2024 - JAN 2025

- Built a fully functional online clothing store using HTML, CSS, and JavaScript.
- Designed product listing, shopping cart, and checkout interface for a smooth shopping experience.
- Focused on responsive design and clean UI to ensure cross-device compatibility.
- Implemented user interaction features like category filters and dynamic product displays.

Certifications

Deloitte Australia Technology Job Simulation on Forge

July 2025

- Completed a job simulation involving development and coding
- Wrote a proposal for creating a dashboard

Deloitte Australia Data Analytics Job Simulation on Forge

July 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

Accomplishments

SIH RUNNER 2023 | National Level Hackathon

GEENOVATE 2K25 | Participated in National Level Hackathon

BURNOUT- A MotoGP Datathon | Participated in Burnout 2025: MotoGP Data Analytics Challenge
